RAGHAVENDRA CHERUPALLI

Tulsa, OK | raghavendra.cherupalli@gmail.com | LinkedIn

EDUCATION

Doctor of Philosophy in Cyber Studies — *August 2024 - Present*
The University of Tulsa — Tulsa, Oklahoma

Master of Science in Cyber Security — *January 2023 - May 2024*
University of Alabama at Birmingham — Birmingham, Alabama

Bachelor of Technology in Computer Science & Engineering — *September 2017 - April 2021*
Jawaharlal Nehru Technological University — Hyderabad, India

SKILLS

- **Languages:** Java, Python, C, C++, R.
- **Databases:** MySQL, PostgreSQL, Teradata DB**.**
- **AI/ML & Frameworks:** PyTorch, Hugging Face, LLMs (In-context learning, Fine-tuning, NLI), Microservices, REST
- **Cyber Tools:** Autopsy, Maltego, Eraser, HxD, IDA, Burp Suite, Nmap and Wireshark.

EXPERIENCE

The University of Tulsa — *August 2024 – Present*
Doctoral Researcher

- **Cybercriminal Supply & Victimization Analysis:** Led threat intelligence research into the TSS ecosystem by bridging supply-side cybercriminal communications with victim telemetry and quantified attack vectors and lure efficacy through statistical correlation *(Accepted at ACM CCS TAKEDOWN 2026).*
- **Technical Support Scam Ecosystems:** Led AI-driven investigations into illicit online marketplaces; fine-tuned a Natural Language Inference (NLI) model for post-type classification, achieving **93% accuracy** through optimized CPU-based deployment *(Published at IEEE EuroS&P WACCO 2026)*.
- **Task-Based Cyber Risk Identification:** Conducted ground-truth qualitative coding on O*NET job profiles; built and evaluated automated classification architectures using LLMs, engineering a **cascade model** that significantly outperformed standalone configurations *(Accepted at HAISA 2026)***.**
- **Classified Marketplace Operations:** Designed an in-context learning framework achieving **97.9% accuracy** in detecting and categorizing criminal services across underground forums (*Published at APWG – Ecrime 2025).*
- **Teaching & Mentorship**: Served as Teaching Assistant for undergraduate courses in **Digital Forensics, System Administration, Operating Systems, Data Security and Cryptography**, providing hands-on guidance and support to students in practical cybersecurity and forensics applications.

University of Alabama at Birmingham — *January 2023 – August 2024*
Cyber Security Researcher

- **Engineered Python-based automation scripts** to efficiently filter, process, and structure raw social media data, enabling the **identification of behavioral and organizational crime patterns** targeting primarily elderly citizens.
- **Exposed interconnected scam networks** by mapping over **50,000 fraudulent profiles and groups**, revealing coordinated large-scale criminal ecosystems operating across multiple regions.
- **Provided actionable intelligence** on fraudulent call center operations to **federal agencies (FBI and FCC)**, supporting efforts to strengthen **defensive measures** and **reduce financial losses**.

Teradata Pvt. Ltd, Hyderabad, India *April 2022 - December 2022*
Associate Software Engineer

- **Built a high-performance microservice** enabling **parallel execution of work threads**, integrating **CI/CD pipelines** for fully automated deployment, leveraging **REST APIs** and the **Hibernate Java framework**.
- Streamlined client support workflows using Jira to troubleshoot and resolve post-deployment issues directly with enterprise users.

Accenture Pvt. Ltd, Hyderabad, India *August 2021 - April 2022*
Associate Software Engineer

- **Developed automation scripts** to measure and enhance the **quality assurance of a banking web application**, ensuring robust functionality and system reliability**.**
- **Monitored performance metrics** and **validated authentication logs**, proactively identifying potential security and operational issues.

PROFESSIONAL CONTRIBUTIONS & PRESENTATIONS

- **Program Committee Member:** APWG eCrime Researchers Symposium (eCrime 2026).
- **Peer Reviewer:** NDSS Symposium 2027 The Network and Distributed System Security (NDSS) Symposium 2027 (Artifact Evaluation), *Computers & Security* Journal, Elsevier.
- **TEDx Speaker:** Invited Speaker at *TEDxUTulsa* (April 2026) – ***Scammers Don't Hack Computers They Hack Emotions.***

ACHIEVEMENTS

- **Outstanding Graduate Student in Cyber Security Award:** University of Alabama at Birmingham (2024).
